About us

Welcome to **AIFM – Astroedge Institute of Financial Market**, India's pioneering stock market institute, located in **Laxmi Nagar, Delhi**. At AIFM, we blend financial education with Astrological Insights, offering a unique and powerful approach to mastering the stock market.

Our institute is dedicated to equipping students, traders, and professionals with practical knowledge and real-world trading experience. We specialize in teaching not just the mechanics of the market, but also the hidden patterns and energies that drive price action—making **AIFM** the only institute in India with deep integration of Astrofinance into technical training.

✧ **Mr. Jagdish Khattar**

He is the **Founder** of **AIFM – Astroedge Institute of Financial Market**, a premier institute dedicated to advanced financial market education. With over 18 years of trading experience and more than 5 years of teaching expertise, he has established himself as a seasoned market practitioner and mentor.

He possesses profound knowledge of **Gann Theory** and **Specializes in analysing Planetary impacts on Stocks and Commodities**—an area that sets him apart in the field of market forecasting. Through AIFM, he continues to guide and inspire a new generation of traders with his unique blend of technical insight and astrological market analysis.

✧ **Mr. Sarvik Khattar**

He is the **Director of Academics and Operations** at **AIFM – Astroedge Institute of Financial Market**. With over seven years of hands-on trading experience and more than two years dedicated to teaching.

He brings a wealth of practical knowledge and expertise to the institute. He is a **Chartered Market Technician (CMT)** and holds certifications from the **National Institute of Securities Markets (NISM)**, underscoring his strong foundation in technical analysis and financial markets. Under his leadership, AIFM continues to empower aspiring traders and financial professionals with cutting-edge education and operational excellence.

Course Details

1. Certified Professional Market Trader (CPMT)

The Certified Professional Market Trader (CPMT) is a flagship certification program by AIFM, meticulously designed for aspiring traders, investors, and financial professionals who seek in-depth, practical knowledge of the Indian stock market from basic to advanced levels.

This comprehensive course provides a **360-degree learning experience**, covering every essential segment of financial markets, including:

- **Equity Markets**
- **Technical Analysis**
- **Derivative Analysis**
- **Commodity Markets**
- **Fundamental Analysis**
- **Currency Markets**

All sessions are delivered by a team of **industry-experienced faculty** including certified traders, analysts, and investment professionals who bring real-world insights into the classroom.

Whether you are a beginner looking to build a strong foundation or a market enthusiast aiming to refine your trading skills, the CPMT program at AIFM prepares you to navigate and succeed in all segments of the financial markets with confidence and discipline.

2. Certified Stock Market Analyst (CSMA)

The Certified Stock Market Analyst (CSMA) is an advanced-level training program offered by AIFM, specially crafted for individuals who want to master technical analysis and evolve into professional traders.

This course focuses on **high-level technical concepts** and real-market application, making it ideal for those who already understand the basics and want to deepen their trading skills with a **strategic and systematic approach**.

Key highlights of the CSMA program include:

- In-depth training on advanced technical indicators
- Use of multi-indicator trading systems and strategy building
- Understanding of market psychology and price behaviour
- High-probability setups using trend-following and reversal strategies
- Real-time chart analysis across different timeframes

Along with the theory, the course places a strong emphasis on **practical trading sessions**. Students engage in:

- Live market tracking
- Trade execution and risk management
- Strategy testing and back testing
- Daily trade reviews with expert feedback

Led by market veterans and certified technical analysts, the CSMA course bridges the gap between theory and real-world trading. Our mission is to help learners transform into confident, independent, and professional traders ready to tackle today's fast-paced stock markets.

Whether your goal is full-time trading, part-time investing, or a career in technical analysis, the CSMA program at AIFM equips you with the skills, tools, and discipline to succeed.

3. Certified Derivative Expert (CDE)

The Certified Derivative Expert (CDE) is a specialized, advanced-level program by AIFM designed for traders and finance professionals who want to master the complex world of derivatives trading and become professional market participants.

This course offers in-depth knowledge and hands-on expertise in equity, index, and currency derivatives, with a sharp focus on strategy development, data-driven trading, and risk management.

Key highlights of the CDE program include:

- Advanced understanding of Futures & Options
- In-depth coverage of Options Greeks, Implied Volatility, and Payoff Diagrams
- Learning and applying proven derivative trading strategies:
 - Delta-neutral strategies
 - Volatility-based setups
 - Multi-leg options strategies (Iron Condor, Butterfly, Calendar Spread, etc.)
- Back tested and data-supported strategies for high-probability trades
- Interpreting open interest, FII/DII data, and market sentiment indicators

The program is deeply practical in nature, featuring:

- Live market sessions and trade execution
- Building and testing your own strategies with real data
- Regular trade reviews and expert mentorship
- Interactive case studies and simulations

Led by experienced derivative traders and analysts, this course transforms participants into strategy-focused, risk-aware professionals capable of trading independently and profitably in all market conditions.

Whether you're aiming to work with a prop desk, manage your own portfolio, or simply take your trading skills to a professional level, the CDE program at AIFM is your pathway to becoming a derivatives trading expert.

4. Certified Astrofinance and Technical Analyst (CATA)

The Certified Astrofinance and Technical Analyst (CATA) is a unique and advanced course offered exclusively by AIFM, designed for traders and analysts who wish to integrate financial astrology with modern technical analysis to gain an edge in the stock market.

In this specialized program, participants learn how planetary cycles, lunar phases, and astrological transits influence market psychology, trend shifts, and volatility. The course blends ancient Astro-knowledge with practical trading techniques to help traders anticipate key market turning points with precision.

Key Concepts Covered:

- Introduction to Financial Astrology and Astro-Cycles
- Planetary Aspects and their historical impact on market movements
- How to predict intraday reversal timings using planetary hours
- Identifying major move days, gap-up/gap-down predictions, and swing tops & bottoms
- Astro-backed support and resistance zones
- Combining astrology with technical indicators for confirmation

Practical Training Includes:

- Live market analysis using planetary cycles
- Chart setups with Astro-timing tools
- Case studies of major market moves linked to astrological events
- Intraday and positional strategy building using Astro-technical alignment

Taught by experts in Astrofinance and market strategy, this course is ideal for traders seeking deeper insight beyond charts and indicators, and for those looking to master timing the markets with higher accuracy.

Explore one of the most powerful forecasting tools in trading, the CATA program at AIFM opens the gateway to a rare and valuable skill set that few traders possess.

5. Astro-Gann Analyst (AGA)

The Astro-Gann Analyst (AGA) is a specialized and advanced program offered by AIFM, designed for traders and analysts who wish to master the powerful synergy of W.D. Gann's market theories and financial astrology to forecast market movements with high precision.

This course provides a deep dive into Gann's legendary tools and time cycles, combined with astrological principles to identify major market levels, reversal zones, and key timing windows. Students learn how to decode market patterns not just by price action, but through the hidden rhythm of time and planetary influence.

Key Learning Highlights:

- Introduction to financial astrology and planetary aspects
- Comprehensive study of Gann Theory and its modern applications
- Mastering Gann angles, Square of 9 and Gann grids
- Understanding and applying Gann time cycles and price-time square
- Identifying major support/resistance, breakout points, and reversal zones using Astro-Gann synergy
- Practical forecasting techniques for equity, commodity, and index markets

Practical Applications:

- Live charting with Gann tools and Astro
- Timing major market moves based on planetary transits and Gann cycles
- Real-time case studies and back-tested forecasts
- Strategy building using a combination of time, price and astrology

The AGA program at AIFM is perfect for serious traders, technical analysts, and market students who want to move beyond conventional analysis and gain true market timing skills. With expert mentorship and hands-on experience, you'll learn how to view the market through a completely new and powerful lens.

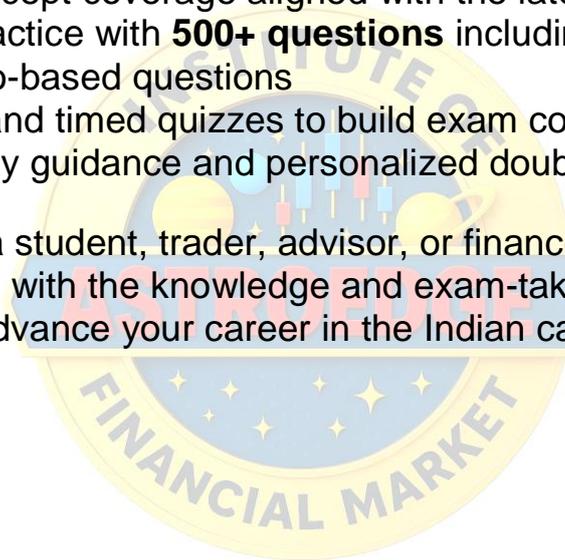

6. NISM and NCFM Certification Courses

The NISM and NCFM Certification Preparation Course at AIFM is a comprehensive program designed to help aspiring finance professionals successfully clear the major certification exams mandated by the Securities and Exchange Board of India (SEBI) and National Stock Exchange (NSE).

This course covers the full spectrum of topics across the most sought-after **NISM** and **NCFM** modules, including equity, derivatives, mutual funds, research analysis, and more. Our intensive preparation methodology includes:

- Detailed concept coverage aligned with the latest exam patterns
- Rigorous practice with **500+ questions** including multiple-choice and scenario-based questions
- Mock tests and timed quizzes to build exam confidence
- Expert faculty guidance and personalized doubt-clearing sessions

Whether you are a student, trader, advisor, or finance professional, this course equips you with the knowledge and exam-taking skills to achieve certification and advance your career in the Indian capital markets.

- Currency Markets in India
- Currency Derivatives
- Trading Mechanism in Derivatives

6. NISM Equity Derivative Certification Exam

The NISM-Series-VIII: Equity Derivatives Certification Examination is a mandatory certification prescribed by the Securities and Exchange Board of India (SEBI) for professionals working in the equity derivatives segment of Indian stock markets. Conducted by the National Institute of Securities Markets (NISM), this exam is designed to ensure that market participants possess a sound understanding of the functioning, products, trading strategies, and regulatory framework governing equity derivatives in India.

Equity derivatives—such as futures and options on stocks and indices—play a crucial role in modern financial markets, offering tools for hedging, speculation, and arbitrage. With growing market participation and increasing volumes in derivatives trading on platforms like NSE and BSE, it is vital for individuals involved in trading, advisory, risk management, and compliance to have both theoretical knowledge and practical insight into this segment.

This certification exam equips candidates with comprehensive knowledge of:

- Basics and evolution of derivatives
- Trading and settlement mechanisms
- Derivatives strategies using futures and options
- Regulatory framework and risk management practices

Successful completion of this exam is essential for anyone aspiring to build a career in equity derivatives trading, research, or client advisory services. It also serves as a valuable credential for finance professionals looking to strengthen their expertise in capital markets.

7. NISM Research Analyst

The NISM-Series-XV: Research Analyst Certification Examination is a regulatory certification mandated by the Securities and Exchange Board of India (SEBI) for individuals engaged in providing research reports and investment recommendations in the Indian securities market. Conducted by the National Institute of Securities Markets (NISM), this certification ensures that professionals possess the essential knowledge, analytical skills, and ethical grounding required to function as competent and responsible research analysts.

In today's dynamic financial environment, research analysts play a critical role in guiding investors through informed decision-making. Whether working independently or as part of a brokerage, advisory firm, or asset management company, research analysts are expected to evaluate market trends, analyze financial statements, assess company fundamentals, and provide investment insights that align with investor goals.

This certification exam covers:

- Basics of securities markets and investment products
- Fundamentals of economy, industry, and company analysis
- Valuation methodologies
- Qualitative and quantitative research techniques
- Ethical and regulatory framework for research analysts

Passing this exam is mandatory under SEBI (Research Analyst) Regulations, 2014 for anyone who wishes to publish research reports or offer investment recommendations. It is ideal for finance professionals, aspiring analysts, investment advisors, and those looking to build a career in equity research or portfolio advisory.

8. NISM Mutual Fund Distribution Exam

The NISM-Series-V-A: Mutual Fund Distributors Certification Examination is a mandatory certification prescribed by the Securities and Exchange Board of India (SEBI) for all individuals involved in the marketing, selling, and distribution of mutual fund products in India. Conducted by the National Institute of Securities Markets (NISM), this certification aims to equip mutual fund distributors with a strong understanding of mutual fund concepts, product structures, risk factors, investor suitability, and regulatory guidelines.

As mutual funds become an increasingly popular investment vehicle for retail and institutional investors, the need for knowledgeable and trustworthy intermediaries has grown. Certified mutual fund distributors play a vital role in guiding investors to choose the right schemes based on their financial goals, risk appetite, and investment horizon.

This examination covers:

- Basics of mutual funds and fund structure
- Types of mutual fund schemes and their features
- Offer document and fund fact sheet analysis
- Suitability and financial planning concepts
- Operational aspects like NAV, SIPs, redemptions
- SEBI regulations, code of conduct, and AMFI guidelines

Clearing this exam is compulsory for AMFI registration and is a prerequisite for anyone wishing to operate as a mutual fund distributor, agent, or advisor. It is ideal for aspiring financial intermediaries, bankers, investment advisors, and wealth management professionals looking to serve India's growing investor base.
